

Custom Software Applications

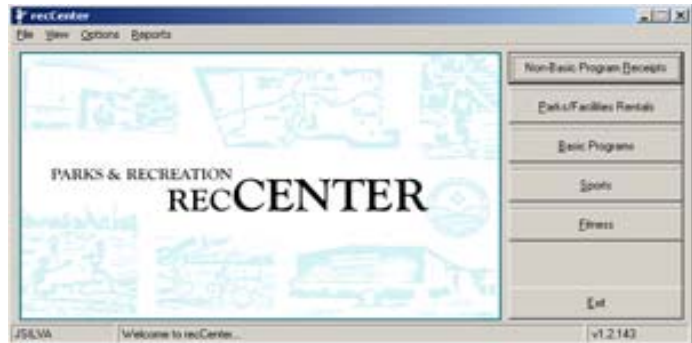

RecCenter

Parks and Recreation Tracking Software

Parks and Recreation systems have their own special needs when it comes to managing payments, scheduling, registration, and document imaging. RecCenter is the first software specifically developed for handling all of these needs that parks and recreation departments require in their day to day operations, with digital imaging integration included!

RecCenter has six different modules to completely handle all of your Parks and Recreation department needs:

- Fitness Center
- Activity Center
- Rental Center
- Sports Center
- Receipt Center
- Reports Center

RecCenter Modules

Fitness Center - Designed to track and record membership usage of fitness related facilities. Store vital participant information including medical release information. "Check in" members and track their visits using bar coded membership badges, as well as notification of membership expiration.

Activity Center - Enter participant information and track payment transactions for community or center programs, such as: child care, senior programs, exercise classes. Capture data specific to programs with user-defined fields, including payment specifics. Easily print program rosters and track class attendance.

Rental Center - Administrate rental reservation and payment information for any and all facilities associated with a recreation center (i.e. gyms, kitchens, community halls, pools, fields, and more.) Track reservation dates and times and allowing for recurring rental registrations. Notify users of rental time conflicts to eliminate over booking.

View Paper Documents
Fee Configuration
Sports Team Tracking
Multiple Security Settings
Payment Reports

Allows you to select center, facility, rental date, time and length, then automatically generates fee from pre-defined rates
Easy calendar interface lets employees see quickly what days and times are available

Search by numerous different fields, including facility, date, participant name, team name, etc.

Know parent/guardians, including who is authorized to take children
Sign up participants for programs including parent/guardian, emergency, and medical information

Printer will output accurate receipts at one touch
Add applications and other documents to the participant database by name and date when integrated with ApplicationXtender

See all paper records that are associated with the participant

Choose the registration or rental types and fees for each

Input team names, divisions, coaches and participants

Set up user accounts and choose their level and privileges

Generate payment history reports by date ranges

Sports Center – Manage your team registrations with this module that is fully customizable to accommodate a variety of different sports leagues. Track leagues, teams, coaches, participants and handle your league scheduling all in one place.

Receipt Center – This module provides you the ability to accept payments and produce receipts for miscellaneous transactions not associated with any other module/center.
